Fleet Management

Keep control of your assets at all times, optimizing resources, improving your management, and increasing the profitability of your business.

Ensure business profitability by monitoring critical vehicle indicators, such as geographic location, speed, and direction of movement, as well as safety and efficiency information associated with peripherals (motor telemetry, fatigue sensor, third eye, monitoring cameras, etc.).

Access the information you need precisely when you need it, using one of the multiple platforms that GPS Chile has designed to met the specific needs or our customers.

GPS CHILE HAS A VARIETY OF SOLUTIONS TO EFFICIENTLY MANAGE YOUR FLEET

TRACK

GPS Chile's Track platform helps you save time by quickly and securely accessing key information on your vehicles and fleet, with an intuitive, user-friendly interface. The platform provides real-time alerts, reports, and historical data for managing your fleet.

It includes an information-sharing module, so that both you and your client can independently visualize and manage your trucks.

NAVMAN - DIRECTOR

You can control your business simply and quickly using the DIRECTOR platform, a world-class solution that lets you know the operational status of every vehicle in a fleet in real time. This is the most robust, most complete platform on the market.

It includes a High Definition module, which provides second-to-second tracking of your vehicles' activity; an Offensive Driving module, for building driver rankings; a Maintenance module; and a Create Your Own Reports module, for easily visualizing key business indicators

ORVIS

With Orvis GPS, you can monitor your vehicles 24/7, from anywhere and using any device. It contains a wide range of programmable alerts and reports for proper fleet management, as well as vehicle maintenance and efficient driving modules that allow you to optimize your resources.

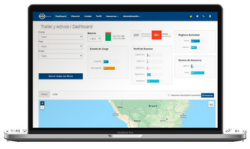
Thanks to the ORVIS GPS app, you can monitor your assets and receive real-time notifications and alerts in the palm of your hand

MULTI-FLEET

Reduce your control time with this platform, which lets you track all your assets and vehicles on a single screen, independently of the GPS supplier company; includes speeding alerts.

Designed for people who handle different fleet management suppliers.

TRAILER AND ASSETS



You can easily access and visualize complementary information on assets such as ramps, machinery, containers, and any other asset that does not have an energy source for operating.

The ability to geographically locate every unit gives you a better understanding of your entire operation
